Ermekov Tariel

Front-end Engineer & 4+ years of experience

Location: Bishkek / Kyrgyzstan

I'm a developer who keeps up with trends and prioritizes quality. Always on the lookout for new opportunities for
professional growth, I excel in teamwork and can also make significant individual contributions.

My core skills include:

Frontend: React, Next.js, TypeScript, Redux (thunk, saga, toolkit), JavaScript (with ES6), React Query, HTML, CSS, Sass-Less, Tailwind, Bootstrap, Firebase, D3, Styled-components, RTK-query, AntDesign, Material-UI, React-Spring, Gsap, Leaflet, Atomic Desig

Testing: Unit, Integration, E2E, Cypress, Jest, RTL, Loki, Enzyme
Other: Git, Gitlab, Bitbucket, Github, Figma
Social Media: Github // Linkedin // My Telegram // ermekovtariel@gmail.com

EXPERIENCE

Level Up Star / Front-end Developer   **10.2020 - 02.2021 / 4 month / Full-time**
Level Up Star is an outsourcing company that nurtured a promising developer by introducing him to projects such as: Loook — a classified ads platform featuring advanced search capabilities and a sleek, user-friendly design. I was responsible for developing the UI, integrating REST APIs, and managing state with Redux, utilizing technologies like Material UI, React, and Next.js.

Projects: Loook

Kundoluk / Front-end Developer   **02.2021 - 05.2022 / 1 year + 3 month / Full-time**
Kundoluk is an efficient and functional educational software that provides a complete coverage of the required functions for educational institutions:
As a front-end engineer, I solved various tasks, including playing a key role in the development of B2B educational solutions, including creating responsive web designs
and improving features using cutting-edge front-end technologies along with progressive development methods to create efficient and scalable web applications. In addition, I actively used tools for process automation and code quality improvement.

During this time, I significantly honed my skills in React and Redux, diving deep into their functionality and best practices, thereby increasing my qualifications

Projects: Kundoluk, Admin's Kundoluk, President's Kundoluk

WildBox / Front-end Developer   **06.2022 - Present / 2 year + 6 month / Full-time**
As a Front-End Engineer at WildBox, I:
- Conducted code reviews and improved the architecture of 2 projects developed by a team of over 4 engineers
- Implemented modern technologies and approaches to enhance application performance and quality
- Optimized internal team processes, ensuring efficient collaboration and timely delivery of tasks
- Participated in drafting technical specifications during the acquisition of new projects, contributing to their
- successful launch.

Projects: WildBox, NDA - (Confidential project)
